

SYSTEMATIKDAGARNA GÖTEBORG 2019

Monday 18/11

9.00 Register and coffee

10.00 **Ellen Larsson** - Welcome and practical information

10.10 **Henrik Aronsson** - opening

10.20 **Liselott Sjödin Skarp** - News from the Swedish Species Information Centre. (in Swedish)

10.40 **Johan Liljeblad** - Linked Open data.

11.00 **Allison Perrigo** - Space for Systematics during a Biodiversity Crisis.

11.15 **Nils Cronberg** - Hybridization as an evolutionary force in bryophytes.

11.30 **Kennet Lundin** - Gotta catch ´em all, hidden diversity of nudibranchs on the Swedish west coast.

11.45 **Anieli Pereira** - Macroevolutionary patterns of turtles.

12.00 Lunch

13.00 **Nicholas Chazot** - The decline of European butterflies: an evolutionary approach.

13.15 **Jadranka Rota** - Conflict between phylogenies inferred from amino acid and nucleotide datasets: a 338-gene phylogeny of Lepidoptera as a case study.

13.30 **Nannie Persson** - A backbone phylogeny and its uses – an example from *Potentilla* L. (Rosaceae).

13.45 **Ted von Proschwitz** - Phylogenetic studies in the land snail genus *Vertigo* O. F. Müller.

14.00 **Anja Rautenberg** - Världsarvsnomineringen: The Rise of Systematic Biology.

14.15 oral presentation Vacant (or poster presentation earlier)

14.30 Poster presentations /1 min each

14.45 Poster-mingle and coffee

15.00- 16.00 **Maria Backlund** - Separate meeting with STI funded researchers.

16.00 Systematikföreningen - annual meeting

17.00 Glühwein and socializing in the green house of the Botanical garden.

18.30 Mini-tour of the exhibitions at the Gothenburg Natural History Museum.

19.30 Vegetarian buffé at the Malmska valens café at the Natural History Museum.

Tisdag 19/11

9.00 **Freek Bakker** - The Global Museum: natural history collections and the future of evolutionary biology and public education.

9.45 **Magnus Geland** - How do we actively manage our collections? Cases from bird collections in Europe in general and Gothenburg in detail.

10.00 Coffee break

10.30 **Mari Källersjö** - Living collections in Botanical gardens.

11.00 **Henrik Nilsson** - Fungal diversity and distribution: collections, DNA sequences, and bioinformatics.

11.30 Discussion: moderator **Allison Perrigo**

12.00 Lunch

13.00 **Emma Wahlberg** - The reports of my death are greatly exaggerated.

13.15 **Andrea Costa** - Evolution and diversification of bromeliads in the neotropics.

13.30 **Matheus Guimarães Cardoso Nogueira** - An unknown diversity of Bromeliaceae in the Brazilian Amazon.

13.45 **Beatriz Neves** - Evolution and diversification of *Vriesea* (Bromeliaceae) determined by bat and hummingbird pollinators.

14.00 **Fabiano Salgueiro** - Morphological and genetic diversity of four *Stigmatodon* species (Bromeliaceae) endemic to inselbergs in the metropolitan region of Rio de Janeiro, Brazil.

14.15 **Igor Musauer Kessous** - Taxonomy of *Vriesea* Lindl. (Bromeliaceae): Advances and perspectives.

14.30 Second poster-mingle

14.45 coffee

15.30 **Kennet Lundin** - Awarded prize for the best poster and oral presentation

15.45 Closing remarks and presentation of Systematikdagarna 2020

16:00 End

ARTDATABANKEN
